Acknowledgments

To finish this PhD is far from an easy accomplishment: I felt bewildered, devastated and exhausted from time to time; nevertheless, to appreciate and enjoy the European life style is even harder: the culture and mindset are so different from what I grew up with. Finally, I made it and I feel extremely lucky to be supported with so many kind people who made me enjoy this period so much.

A thousand thanks to Syuzi for your supervision, and even more importantly, for your patience. You will probably remember me because of the hilarious mistakes I've made. Thank you for leading me into the world of chemistry and motivating me with your determination. You are the example I am going to follow in my life.

I would like to thank the members of the reading committee for your suggestions and approval of my thesis: Prof. B. L. Feringa, Prof. W. R. Browne and Prof. C. Mazet.

I would like to thank Adri for the helpful collaboration on the project of asymmetric alkylation of acylsilanes. I also greatly appreciate your suggestions on my future career and recommendation letters.

Wesley, thank you for correcting my papers and thesis and also for giving valuable suggestions about my chemistry and career. Edwin, thank you very much for your collaboration on the project of asymmetric alkylation of silyl ketimines.

Thank you Craig for hosting me for the collaboration in the USA and inviting me to watch football games; Michael for your help of NMR and the city tour; Steven for fighting together with me, driving me around after work everyday and introducing American culture to me; Jared I enjoyed working with you and also of course the hangout in the spare time.

Thank you very much the analytical team: Pieter for helping me with NMR, Teodora for the HRMS and Monique for HPLC and GCMS.

I also would like to thank Hilda, Tineke, Annette, Alphons and Cristina for your help with documents.

I want to thank my paranymphs Francesca and Juanfer who I met at the beginning of my PhD and in the end. Francesca "salsa": I won't be able to survive without you at the beginning. You are a super kind person and I will always miss the years we have worked next to each other. Juanfer "Juan ferrari", I feel grateful to your company. You are always willing to help and take care of us. Your Photoshop skill is absolutely amazing.

Here I also want to thank the people who are initially my colleagues but now are my friends: I am very lucky to be part of "the sublime group" and I will always miss you guys! Rik, when I met you at the first time I would never image that we could become such close friends. Anto, "the young and old professor", thank you for being my first European friend and showing me your passion about chemistry. Nop, I really appreciate what you have kindly done to me when I started my PhD. I was so desperately depending on you and I've learned various skills from you. Pablo "pablosa", you are so knowledgeable and curious. With your presence we never run out of topics for the lunch discussions! Tilde, you are the angel of the group, being cheerful and considerate all the time. Simone, "Simona", it is so pleasant to have you around and I will always miss the MMA trainings. Carlos, “carlo”, if I haven’t met you, I would never say I’ve been going out. You are a talented researcher as well. Thank you for teaching me how to read NMR. Francesco, I will definitely miss the Sunday running and chatting with you! Thank you for inviting us to spend Christmas with your family, which is a unique experience and surprised me how much similar Italians and Chinese could be.
